

# The Cultivation Technology by spores

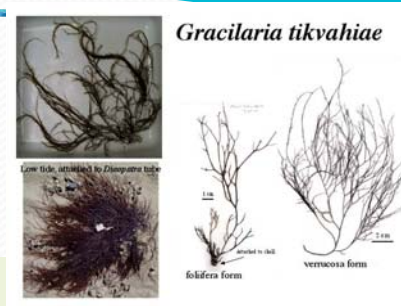

**Macrocystis sp.**

# Cultivation Macrocystis by spores

## Red Seaweed like: *Gracilaria* sp.

1. High Growth rate, easy to harvest and cultivate.
2. Contents a very good chemical composition for many derivated products.
3. Not compete with other seaweed known as edible seaweed.

# Availability of Gracilaria Seaweed: All as you need

# Gracilaria harvest in Chile

*Thank you
